

OMNIHOUT AGROSTORAGE

Boxes

For storing and drying products like potatoes, onions and seeds proper boxes are required. OmniHout BV develops different kinds of boxes suitable for different drying methods. All our boxes are made of certified wood. In this folder you can find a summary of our assortment.

Open batten boxes

Standard open boxes for storing potatoes and onions.

The open boxes contain gaps between the battens. This makes lengthwise and room ventilation possible.

Closed batten boxes

The battens of the closed boxes are placed against each other.

Box with closed pallet bottom suitable for pallet ventilation.

The air can escape through a gap between two boxes.

Seed boxes

Seed boxes are available in different sizes.

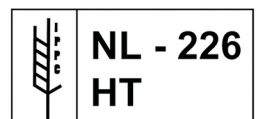

Measuring equipment can be hung up inside the box through a gap.

The bottom of a seed box contains a mesh.
