

OMNIHOUT AGROSTORAGE

Industrial transport pallets and boxes

OmniHout BV produces pallets and boxes for transportation of industrial parts. These pallets and boxes are custom made for each product that has to be transported. The boxes are designed with a pallet underneath to make transport with a forklift possible. The boxes are made of WBP plywood which is durable material. This means that our boxes are exempt in the ISPM15 norm and suitable for transportation all over the world. Besides we guarantee quick deliveries.

Standard transport boxes made of WBP plywood.

The boxes can be ordered in any size.

The pallets are easily movable with a forklift.

Pallet to transport large parts.

Internal storage

For internal storage simple light-weight boxes are used. The boxes can be developed with wheels underneath and/or hinged lid.
